

FSTA[®]

sciences of food and health

THE DATABASE DESIGNED FOR THE FOOD COMMUNITY

We know that searching online for reputable and relevant research can be a frustrating and time-consuming exercise.

It's no surprise then that many in the global food community are fed up with scrolling endlessly through unsuitable results - however, there is a solution: FSTA!

WHY FSTA?

FSTA can be trusted by those studying and working in the sciences of food and health because it's been developed expressly for them.

Containing only information which is relevant to food, beverages and nutrition, FSTA is carefully structured making it highly effective for information searching in the sciences of food and health. This enables researchers, scientists and students to retrieve high quality, interdisciplinary results with a minimal chance of false hits.

WHAT INFORMATION CAN YOU SEARCH?

Confidently research content carefully curated by experts in the sciences of food and health.

- Discover research from **62** countries, in **37** languages.
- Search over **1.5 million** high-quality abstracts directly related to food and beverages.
- Draw from over **22,675** sources, including nearly **5,500** scientific journals.
- Reference abstracts that span over **50** years of research.
- Keep up-to-date with cutting edge research, with weekly updates.

RESULTS YOU CAN TRUST

The FSTA database is closely managed by a team of expert scientists, who rigorously assess every title indexed, filtering out predatory and substandard journals.

You can be confident everything you find on FSTA is relevant to your field and meets high standards of scientific validity and rigour.

Discover powerful search functionality designed specifically for food and beverage research

Make targeted search queries referenced against the world's most comprehensive food thesaurus

TRAINING AND PROMOTIONAL MATERIALS

Did you know we offer free training demos and promotional resources for organisations using FSTA? This applies to both subscriptions and trials to help users get the best out of their access. Contact Rhianna Gamble, Head of Marketing, at r.gamble@ifis.org.

DID YOU KNOW YOU CAN USE FSTA TO RESEARCH FOOD INFORMATION ACROSS DISCIPLINES?

In addition to the core areas of food science and technology, FSTA includes relevant content across a host of related fields, including:

AGRICULTURAL SCIENCES

ANIMAL SCIENCES

BIOTECHNOLOGY

BREWING AND DISTILLING

CHEMICAL ENGINEERING

ENDOCRINOLOGY

ENVIRONMENTAL SCIENCES

METABOLOMICS

MICROBIOLOGY

NUTRITION

PLANT SCIENCES

PUBLIC HEALTH

SPORT SCIENCE

TOXICOLOGY

VETERINARY SCIENCES

FSTA: NUMBER OF RECORDS ADDED ANNUALLY

USING FSTA ON EBSCO

- Use the FSTA Thesaurus, the most comprehensive food and beverage thesaurus in the world, to browse, search, explode and combine terms for powerful search results
- Recently updated, the FSTA Thesaurus contains 13,000+ subject-specific terms used for in-depth indexing, enabling users to search efficiently and effectively
- Subscribe to FSTA through EBSCOhost
- Filter your results by whether information has been peer-reviewed ([NEW](#))
